

Cool Control 1.0 l

Chilled to 4° C for milk perfection

The innovative milk cooler not only creates the perfect experience for the palate, but looks stylish too. Milk with an ideal temperature of 4° C combined with optimum hygiene provides the perfect basis for creating a wide range of recipes. Elegant design, robust materials, high-quality aluminium details and optimum convenience make the Cool Control the perfect accessory for any automatic coffee machine.

Holding capacity stainless steel container	1.1 l
Cable length	approx. 1.8 m
Weight	approx. 2.5 kg
Dimensions (W×H×D)	14.4×22.5×21.7 cm
Article number	24055
Optional accessory	
Wireless Transmitter	24031

Ingenious design

The design of the Cool Control reflects the classic JURA look and is perfectly matched with the simple handling and optimum hygiene of the device. The Cool Control features premium materials, a solid, high-quality aluminium cover and elegant ventilation slots. With its clean, minimalist lines, the Cool Control 1.0 l harmonises with any JURA coffee machine.

Perfect milk results

With the Cool Control you can create fresh, fine-textured milk foam for on-trend drinks such as the flat white, with perfect results every time. To achieve this the milk is kept chilled to an optimum 4° C. The device also prevents the problem of splashing while coffee is being prepared. The continuous wireless communication between the Cool Control and the automatic coffee machine*, plus the newly integrated level indicator, ensure that the user is always reminded when the cooler needs to be topped up with milk.

*By using the Wireless Transmitter (available as an option) the Cool Control is compatible with all JURA automatic speciality coffee machines that are equipped with Smart Connect.

Maximum convenience

The fact that milk can be added quickly and easily without needing to remove the milk container, the digital temperature display and the push-on aluminium cover, which is optimally adapted to the container, provide easy handling and maximum convenience.

Optimum hygiene

Perfectly fitting connectors ensure optimum milk hygiene from Cool Control to cup. From the high-quality stainless steel container to the suction lance, all components that come into contact with milk are dishwasher-safe, making them very easy to clean: stainless steel container/silicone ring/cover/metal tube/adapters.
